ELECTRIFYING NEWS

Ways to Save Money on Your Electric Bill

Along with your other holiday bills coming due, you still will receive your regular bills, including utility bills. If the cost of electricity is getting you down, consider these ways to make your next bill smaller.

- Make sure that you set your thermostat to a comfortable level. Generally, this means your thermostat should be set to no higher than 70 degrees in the winter.
- If there is a dryer in your home, try removing clothing when it is still slightly damp and hanging it to dry. Not only do you save electricity, your clothes will last longer and require less ironing.
- Taking a long, hot shower is something that would show up on a water bill. Remember that heating water is expensive also. Take care to not let hot water run when shaving or washing dishes.
- Keep your refrigerator clean and vacuum the motor and coils at least once every three months. If your freezer is somewhat empty, fill empty milk jugs with water and keep them in the freezer.
- Use fluorescent bulbs in place of incandescent bulbs, and always use the lowest wattage necessary. Remember to turn off lights when you are not using them.
- Do not use the heated dry setting on your dishwasher; let your dishes air dry.

By taking these simple steps, you can save money on your utility bills next time around. You are also helping to protect the environment by reducing your energy consumption.
