PROJECT UPDATES

Dear Parkview Point Residents,

We would like to provide you with the following project updates as of January 17, 2025:

ELEVATORS PROJECT UPDATE

The repairs for the service elevator are expected to be completed by tomorrow, pending the arrival of the final part, which is scheduled for delivery this afternoon.

On Monday of next week, Nouveau contractors will work on replacing the governor rope for Elevator #2 and conducting pre-testing for elevator recall. Following this, the Association will coordinate with the contractors to schedule the annual inspection for the elevators and address any outstanding items. We anticipate resuming the cabin replacement for Elevator #2 in February, assuring that Elevators #1 and the service elevator are functioning without issues.

FIRE ALARM PROJECT

The final inspection for the fire alarm project is scheduled for Friday, January 24, 2025. This inspection will cover the elevator recall and address any outstanding corrections noted during the last inspection. If everything goes smoothly, we will close this project soon.

Please note that today, a false alarm was activated on the 15th floor at approximately 12:48 p.m. due to excess cooking smoke. The system is functioning as intended; however, the Association might consider adjusting the sensitivity of the smoke detectors to minimize false alarms. We will work with the contractors on this matter. In the meantime, we encourage all residents to be cautious when letting smoke escape into the hallway, as it can trigger the alarm.

POOL RENOVATION

The pool permit application has been submitted and reviewed by the City of Miami Beach. There are a few pending corrections on the plans to be made by the engineer, as requested by the city regarding landscaping and lighting. Next week, we will meet with the contractors to discuss the action plan and tentatively aim to commence this project by February. All the materials for the project have been delivered to site. Updates will follow as progress is made.

WINDOWS REPLACEMENT

The window replacement permits have been submitted and are currently under revision by the City of Miami Beach. The Association is coordinating with South Florida

Continued on page 2

Project Updates (cont. from page 1)

contractors for the planning phase of the project, which is tentatively set to start by the end of March. According to the schedule provided by the contractors, the work will begin on Line "I," from the top floors to the bottom.

The contractors will approximately spend three (3) days in each apartment as follows:

- Day 1: Protection, Removal & Installation
- Day 2: Interior Finishes
- Day 3: Pending Items

Water testing will be completed after all apartments in the same line have been finished. The project will take approximately 12 working days (Monday through Friday) PER LINE, including water testing. The total project length is estimated to be 220 working days, which translates to 44 weeks for completion, subject to weather conditions and unforeseen delays.

60 YEARS RE-CERTIFICATION

The Association is currently in the bidding phase for the structural portion of the project. The electrical work for the re-certification has been completed, as indicated in the

preliminary report received from the engineer. All electrical work orders have been finalized, and the re-inspection for the final report will be submitted to the city.

The Structural portion of the project is divided into two parts:

Project #1: This project addresses the stucco repairs. The deficiencies described in the report are minor structural repairs, primarily located in the garage area and around the stair risers.

Project #2: This project focuses on the Dark Blue Exterior Façade Walls, and stairs landing waterproofing.

The building's exterior painting was completed by September 2021. In March 2022, issues with the paint were observed, including fading, discoloration, blistering, and peeling on the dark blue surfaces. Investigations conducted by the Falcon Group, Sherwin Williams, and the contractor America's Best Painting determined that the stairs landing requires waterproofing to prevent moisture penetration. Additionally, there is a suggestion to repaint the three walls in a lighter color, as dark colors are more susceptible to fading and discoloration, primarily due to "efflorescence."

Stairs Landing Waterproofing Application - Sample Application

Following recommendations from America's Best Painting, the maintenance team painted the stairs landing from the 1st to the 3rd floor (A-Line). Once this was completed, America's Best Painting proceeded with sample testing on the front exterior dark blue façade from the 1st to the 3rd floor on August 15, 2024. As of this date, the application has not shown any discoloration on the wall color. In today's meeting, the board will discuss the bids received for the Structural portion of the re-certification.

LANDSCAPING PROJECT UPDATE

The landscaping project is divided into three phases:

- Phase 1: Front Entrance
- Phase 2: Seawall Line
- Phase 3: Pool Area

Phase 1 of the project has been completed. Additionally, the irrigation sprinkler system for Phase 2, along the seawall, is finished but is pending a water connection. This connection will be established once the pool project is finalized.

The sea-grapes bushes that will be planted along the seawall line cannot be planted without proper irrigation, as the line runs through the back of the pool area. Given that there will be demolition in this section, it is best to wait until the demolition is complete before continuing work on the irrigation line.

Thank you for your cooperation and attention on this matter.

ACTUALIZACIONES DEL PROYECTO

Apreciados residentes de Parkview Point:

Nos gustaría brindarles las siguientes actualizaciones del proyecto al 17 de enero de 2025:

ACTUALIZACIÓN DEL PROYECTO DE ASCENSORES

Se espera que las reparaciones del ascensor de servicio se completen mañana, a la espera de la llegada de la pieza final, cuya entrega está programada para esta tarde.

El lunes de la próxima semana, los contratistas de Nouveau trabajarán en el reemplazo del cable regulador del ascensor #2 y realizarán pruebas previas para el retiro del ascensor. Luego de esto, la Asociación se coordinará con los contratistas para programar la inspección anual de los ascensores y abordar cualquier tema pendiente. Anticipamos que reanudaremos el reemplazo de la cabina del ascensor #2 en febrero, para asegurarnos de que los ascensores #1 y el ascensor de servicio funcionen sin problemas.

PROYECTO DE ALARMA CONTRA INCENDIOS

La inspección final del proyecto de alarma contra incendios está programada para el viernes 24 de enero de 2025. Esta inspección cubrirá el retiro del ascensor y abordará cualquier corrección pendiente observada durante la última inspección. Si todo sale bien, cerraremos este proyecto pronto.

Tenga en cuenta que hoy, aproximadamente a las 12:48 p.m., se activó una falsa alarma en el piso 15 debido al exceso de humo de la cocina. El sistema está funcionando como se esperaba; sin embargo, la Asociación podría considerar ajustar la sensibilidad de los detectores de humo para minimizar las falsas alarmas. Trabajaremos con los contratistas en este asunto. Mientras tanto, alentamos a todos los residentes a tener cuidado al dejar que el humo se escape al pasillo, ya que puede activar la alarma.

RENOVACIÓN DE LA PISCINA

La solicitud de permiso para la piscina ha sido presentada y revisada por la Ciudad de Miami Beach. Hay algunas correcciones pendientes en los planes que debe realizar el ingeniero, según lo solicitado por la ciudad con respecto al paisajismo y la iluminación. La próxima semana, nos reuniremos con los contratistas para discutir el plan de acción y, tentativamente, apuntamos a comenzar este proyecto en febrero. Todos los materiales para el proyecto han sido entregados en el sitio. Se realizarán actualizaciones a medida que se avance.

REEMPLAZO DE VENTANAS

Se han presentado los permisos para el reemplazo de ventanas y actualmente están siendo revisados por la Ciudad de Miami Beach. La Asociación está coordinando con los contratistas del sur de Florida la fase de planificación del proyecto, que está previsto que comience a fines de marzo. Según el cronograma proporcionado por los contratistas, el trabajo comenzará en la Línea "I", desde los pisos superiores hasta los inferiores.

Los contratistas pasarán aproximadamente tres (3) días en cada apartamento de la siguiente manera:

- Día 1: Protección, remoción e instalación
- Día 2: Acabados interiores
- Día 3: Asuntos pendientes

Las pruebas de agua se completarán después de que se hayan terminado todos los apartamentos de la misma línea. El proyecto demorará aproximadamente 12 días hábiles (de lunes a viernes) POR LÍNEA, incluidas las pruebas de agua. Se estima que la duración total del proyecto será de 220 días hábiles, lo que se traduce en 44 semanas para su finalización, sujeto a las condiciones climáticas y demoras imprevistas.

RECERTIFICACIÓN DE 60 AÑOS

La Asociación se encuentra actualmente en la fase de licitación para la parte estructural del proyecto. El trabajo eléctrico para la recertificación se ha completado, como se indica en el informe preliminar recibido del ingeniero. Se han finalizado todas las órdenes de trabajo eléctrico y se enviará a la ciudad la nueva inspección para el informe final.

La parte estructural del proyecto se divide en dos partes:

Proyecto #1: este proyecto aborda las reparaciones de estuco. Las deficiencias descritas en el informe son reparaciones estructurales menores, ubicadas principalmente en el área del garaje y alrededor de las contrahuellas de las escaleras.

Proyecto #2: este proyecto se centra en las paredes exteriores de la fachada azul oscuro y la impermeabilización del rellano de las escaleras.

La pintura exterior del edificio se completó en septiembre de 2021. En marzo de 2022, se observaron problemas con la pintura, que incluían decoloración, formación de ampollas y descascarillado en las superficies de color azul oscuro. Las investigaciones realizadas por Falcon Group,

Actualizaciones Del Proyecto (viene de la pagina 3)

Sherwin Williams y el contratista America's Best Painting determinaron que el rellano de las escaleras requiere impermeabilización para evitar la penetración de humedad. Además, se sugiere volver a pintar las tres paredes de un color más claro, ya que los colores oscuros son más susceptibles a la decoloración y el desvanecimiento, principalmente debido a la "eflorescencia".

Aplicación de impermeabilización del rellano de las escaleras: aplicación de muestra

Siguiendo las recomendaciones de America's Best Painting, el equipo de mantenimiento pintó el rellano de las escaleras del 1.^o al 3.^o piso (línea A). Una vez completado esto, America's Best Painting procedió a realizar pruebas de muestra en la fachada exterior delantera azul oscuro del 1.^o al 3.^o piso el 15 de agosto de 2024. A la fecha, la aplicación no ha mostrado ninguna decoloración en el color de la pared.

En la reunión de hoy, la junta discutirá las ofertas recibidas para la parte estructural de la recertificación.

ACTUALIZACIÓN DEL PROYECTO DE PAISAJISMO

El proyecto de paisajismo se divide en tres fases:

- Fase 1: Entrada principal
- Fase 2: Revestimiento del malecón
- Fase 3: Área de la piscina

Se ha completado la Fase 1 del proyecto. Además, el sistema de riego por aspersión para la Fase 2, a lo largo del malecón, está terminado pero está pendiente de una conexión de agua. Esta conexión se establecerá una vez que finalice el proyecto de la piscina.

Los arbustos de uva de playa que se plantarán a lo largo de la línea del malecón no se pueden plantar sin un riego adecuado, ya que la línea pasa por la parte trasera del área de la piscina. Dado que habrá demolición en esta sección, es mejor esperar hasta que se complete la demolición antes de continuar con el trabajo en la línea de riego.

Gracias por su cooperación y atención en este asunto.
